Raja Saputera

Frontend Engineer | React.js | Next.js | TypeScript

Lubuklinggau, Indonesia (Open to Remote / Relocation) | +62 813-7371-4300 | rajasaputera@gmail.com linkedin.com/in/rajasaputera | github.com/rajastra

PROFESSIONAL SUMMARY

Frontend Engineer with 3+ years of experience building ERP systems, booking platforms, and responsive web applications using React.js, Next.js, and TypeScript. Delivered 5 ERP modules supporting 400+ users, integrated 20+ REST APIs, and built booking interfaces used by 5,000+ active students. Strong in state management, API integration, testing, and Agile collaboration, with a track record of translating business requirements into scalable, maintainable interfaces.

TECHNICAL SKILLS

Core Technologies: HTML5, CSS / SCSS / SASS, JavaScript (ES6+), TypeScript

Frameworks & Libraries: React.js (Hooks, Lifecycle), Next.js, Node.js (Express.js), Redux, Zustand, Context API

Architecture & Testing: RESTful APIs, OOP Concepts, Unit Testing (Jest, React Testing Library), Dependency Injection

Tools & Environment: Git / GitHub / GitLab, Google Cloud Platform (GCP), Jira, Trello, Slack

Soft Skills: Logical Thinking, Problem Solving, Agile/Scrum, Cross-functional Collaboration

PROFESSIONAL EXPERIENCE

Frontend Engineer

Future Gate High School *May 2023 – Present*

- Spearheaded frontend architecture using React.js and TypeScript for 5 core ERP modules (Academic, Admissions, HR, Finance, Inventory), improving school operational efficiency across all departments.
- Architected intuitive, role-specific interfaces that streamlined administrative workflows for 400+ users, from student enrollment through payroll processing.
- Integrated 20+ RESTful APIs and optimized state management (Redux/Zustand) to ensure reliable real-time data synchronization and secure transactions across interconnected modules.

Software Developer (Remote)

Chup Online *Sep 2024 – Jun 2025*

- Developed a full-stack dormitory and hotel booking platform for UKM (Universiti Kebangsaan Malaysia) students, building responsive React.js interfaces alongside backend REST APIs using Node.js/Express.js.
- Reliably served 5,000+ active UKM students by architecting both the client-facing booking flow and the underlying API/database logic that powered it.
- Enabled secure end-to-end online transactions for dormitory rentals and hotel bookings by integrating payment gateway features across the full stack.
- Collaborated remotely within a cross-functional Agile team of 10+ developers and designers across Indonesia and Malaysia, maintaining high application performance across sprints.

Cloud Computing Cohort

Bangkit Academy (Google, Tokopedia, Gojek, Traveloka) *Feb 2023 – Jul 2023*

- Designed and developed a user-friendly admin dashboard using React.js, backed by a RESTful API, to streamline data management processes.
- Built the backend for a waste-scanning capstone application as part of the backend team, deploying the service on Google Cloud Platform (GCP) to ensure high scalability and reliability.

Frontend Engineer (Internship)

Dot Indonesia *Feb 2023 – Apr 2023*

- Contributed to the DPR revamp website using React.js and Next.js, enhancing user experience and site functionality.
- Implemented mobile-responsive, interactive UI layouts using HTML5 and modern CSS/SCSS.

EDUCATION

Bachelor of Computer Science, Institut Teknologi Sumatera

Relevant Coursework: Web Programming, Software Engineering, Object-Oriented Programming (OOP), Data Structures & Algorithms, Human-Computer Interaction (UI/UX), Database Systems, Cloud Computing.

Fullstack Web Developer Bootcamp, Skilvul

Jun 2023 – Dec 2023

- Selected as 1 of 12 participants from 500+ applicants; trained in HTML, CSS, JavaScript, Express.js, and React.js.
